

Context Word Single Replacement

About These Problems

To answer these questions you must match the meaning of one word to the remaining portions of the sentence. The most important things to look for are tone, context, and definition. If the tone is negative try and choose an option with a negative connotation.

Question. Thomas likes baseball and basketball, but he feels _____ about football.

- A. indifferent
- B. phobic
- C. excited
- D. appreciative
- E. agnostic

Answer. A: The first part of the sentence shows a positive relation between Thomas and the two sports. The conjunction used is "but" which means the second half of the sentence is opposite to the first one so Thomas does not like football. The only word that fits is option A in indifferent.
