Addition

About These Problems

These are the most straight forward problems you will encounter. There are no tricks with these problems and just involve adding two numbers in straight or word problem form.

Question. If American Airlines has 300 B737 jets and 500 B757 jets how many planes does it have active if 10 B737s and 15 B757s are out for servicing?

1. 800
2. 825
3. 775
4. 750
5. 700

Answer. 3: 300 – 10 + 500 – 15 = 775 planes are active.
